Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-14 are rejected under 35 U.S.C. 102(a) as being substantially met by Hughes et al.

3. Patentees disclose a foamed propylene copolymer of the claimed type including ethylenically unsaturated monomers other than propylene as comonomers of the copolymer having the claimed melt flow range, a melt strength of at least 5 cN, and a melt drawability of at least 20mm/s and an extrusion process for making same. Note that the claimed copolymer's can be coupled with polysulfonazide (col. 5 line 52 et. Seq.) and all the other claimed properties can be found in c l. 4 lines 23-50.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims rejected under 35 U.S.C. 103(a) as being unpatentable over Lesca et al, alone, or taken with Hughes et al.

6. Lesca et al discloses at the bottom of col. 2 and the top of col. 3 propylene copolymers of the claimed type having the claimed melt strength (col. 2 line 44) and melt flow (example 1) in foaming propylene polymer beads. It is deemed that the melt drawability property called for in the instant claims would be inherently met in view of the fact that all of the other properties called for in the claims are shown the reference which is supported in col. 5 line 55 et. seq. In any case note that the secondary reference also shows the claimed drawability as claimed with all the other properties.

7. The factual inquiries set forth in *Graham v. John D. Re C.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.**
- 2. Ascertaining the differences between the prior art and the claims at issue.**
- 3. Resolving the level of ordinary skill in the pertinent art.**
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.**
